Assignment No: 02
Web Technologies

NAME: SAFA
REG NO: FA24-BCS-151

Assignment Statement:

Assignment 2 — Your E-commerce Site: Static, Responsive Pages

Difficulty: Easy–Medium · Covers: Lectures 5–10 (CSS Fundamentals through Responsive Design and Frameworks) · Folder: assignment-2/

Task: Build the static, responsive front page and product page of your e-commerce site, modeled on your chosen reference site. No JavaScript yet — this assignment is entirely about layout, styling, and responsiveness.

You must build:

A homepage / product listing page with a header (site name/logo, a nav bar, a cart icon that does not need to work yet) and a responsive grid of at least 8 product cards (image, name, price, an "Add to Cart" button that does not need to work yet).

A single product detail page for one product: larger image, name, price, description, quantity selector, and an "Add to Cart" button (again, not functional yet).

A consistent footer across both pages.

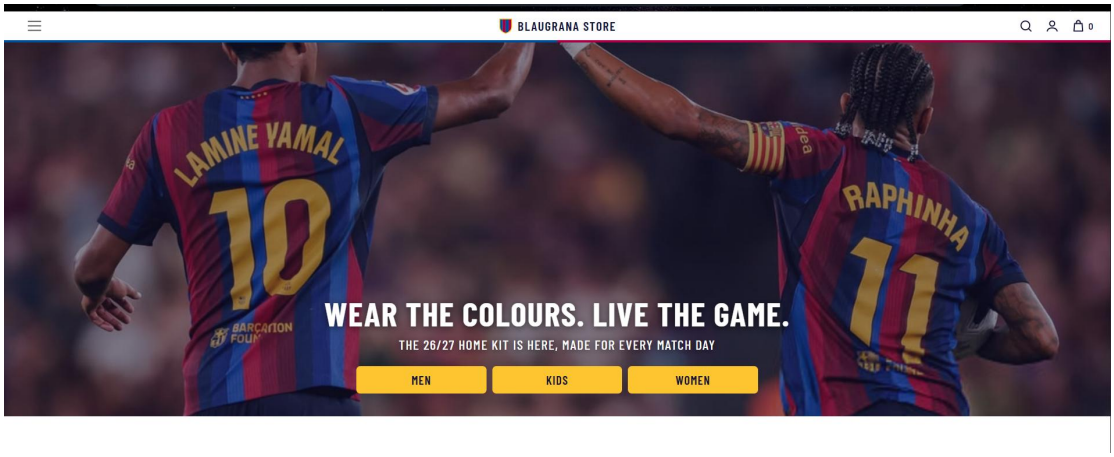

The whole layout built with Flexbox and/or CSS Grid — no table-based layout, no absolute-positioning-everything.

Genuine responsiveness: the layout must reflow sensibly at a phone width (~375px), a tablet width (~768px), and a desktop width, using media queries or your framework's responsive grid classes. Screenshot all three widths for your completion PDF.

Either Bootstrap or Tailwind (your choice) used for at least the grid/layout and the navbar — this is the frameworks half of Lecture 10, and it should actually be doing real work in your layout, not just be linked and unused.

Deliverables in assignment-2/: index.html, product.html, your CSS (or framework config), a README.md with your reference site's name/URL/screenshot (see above), and your completion PDF.
